## B-K Goes Extreme!

B-K Lighting and TEKA Illumination are to be featured on ABC's Emmy-winning reality home improvement program, "Extreme Makeover: Home Edition" scheduled to air March 8, 2009 on the ABC Television Network.

The popular television show taped an episode in Fresno, California featuring the Riojas family from January 8 - 15, 2009.

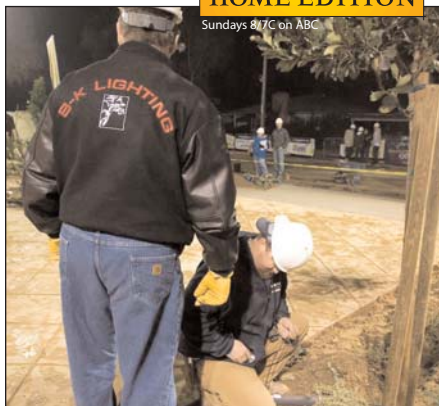

As part of the 'make-over', B-K Lighting contacted local home designers to take part in this massive project.

"It's so wonderful to be part of a community willing to give so much to a family in need of help by taking on the task of building a home in just seven days," said Douglas W. Hagen, President/CEO of B-K Lighting and TEKA Illumination. "To know B-K Lighting and TEKA Illumination are part of this endeavor is something which gives us great pride."

B-K Lighting offered several fixtures for the renovation including: MiniMicro™ floodlights,

Sundays 8/7c on ABC

Available for the first time in Precision 2 is the most comprehensive remote ballast and transformer housing options ever offered including UPMTM, Power Pipe™ and Power Pipe II™.★

**B-K Lighting is turning 25!**

Look for info and events throughout the year!

## Green Team Tip

You can reduce your electricity bills by as much as 10% - simply by unplugging appliances or switching devices off at the power point they are connected to when not in use. Practically every electronic device that you plug into a socket continues to consume electricity after you've switched the device off. It's good for your wallet and for our planet!★

# CUSTOM CORNER

## Ayers Artwork...

Renovation on Philadelphia's landmark Ayer Building required a creative lighting application in order to illuminate these amazing sculptures encompassed along side the higher floors. The solution: Sierra™ Series Sign Star™ Fixtures with 64" of arm support. The machined aluminum arm support, with 360HD knuckle locking technology, allows the lamp to be serviced and returned to it's original position without disturbing the aiming of the fixture. Turret mounted to the top of our TSB ballast on the roof side of the parapet wall allows for rooftop relamping.
