

# Starlines™

## B-K Lighting & Teka Illumination Take to the streets of San Francisco!

The 2009 American Institute of Architects (AIA) Convention was held at the Moscone Center in San Francisco, California and we had the distinct privilege of showcasing our exceptional BKSSL™ technology in our most specified fixtures, including our most recent addition to the Mini Micro™ family, Mini DriveStar™ and iLUME™.

B-K Lighting's Mini-Drive Star™ was the hit of the event. Architects were most impressed with its miniature 2-inch faceplate and the amount of light it projects. The side emitting 360° 1.1 watt LED available in 3000K and 4000K CCT gives the designer options for maximum control. Other attributes this fixture offered such as, field changeable lamps, drive-over rated up to 35,000 lbs and up to 50,000-hour life in four creative colors, it was easy to see why this fixture won an

award at the Rise and Design Expo in Las Vegas last month.

Since 1857 the AIA has represented the professional interest of architects and as of today AIA consists of 85,000 licensed architects, emerging professionals and affiliate design partners. B-K Lighting and Teka Illumination were proud to be part of this annual event. ★

## B-K LIGHTING smartsweepstakes TEKA ILLUMINATION Monthly Winners!

Our monthly winners in the SMART SWEEPSTAKES took full advantage of the new Mini DriveStar™/iLUME™ and Teka High Light™ sample cases! All of our lucky winners will receive a fabulous prize from our prize vault! Congratulations Mariam, Adam, Dave and Kristena! ★

UNIVERSAL POWER MODULE

## Updates!

Our 76 page color catalog showcases all UPM™ products and is organized by fixture, remote and junction box. The newly updated design makes UPM™ even easier to install. Newly added to UPM, is a Junction Box fixture for line voltage products. Splicing has never been simpler. Visit [www.universalpowermodule.com](http://www.universalpowermodule.com)

## Green Team Tip

An average adult in the USA receives a whopping 41 pounds of junk mail a year and approximately 44% of this mail winds up in a landfill without having been opened. So what do you do to try and stem the tide of junk mail clogging up your mailbox and landfill? Having your name added to a "no junk mail" list is a good start! It's good for you and for our planet! ★

# CUSTOM CORNER

## Custom Camino Star™

This Camino Star™ has a custom 10" diameter shade, as well as 7.5 watt, 3000 degree Kelvin, solid state light source. A heavy steel base with low voltage splice compartment, for use in an outdoor roof scape application. This allows the fixture to stay in place without penetrating the weather proof roof membrane with fasteners.

**Custom#:** CUS-1534-11  
**Project:** 7th Generation  
Burlington, VT  
**Specifier:** Naomi Miller Lighting Design - Troy, NY  
**Sales Rep:** Lightspec - (Donna Cregin) Albany, NY
