B-K Lighting Debuts IP68-rated In-grade Luminaire at Lightfair 2003

New York, NY – A submersible-rated in-grade luminaire was unveiled at Lightfair 2003 by B-K Lighting. The new fixture, designed to withstand immersion in up to three feet of water, is called Tenaya® and incorporates a Water Management System which allows the fixture to remain illuminated even when it is completely submerged.

The Tenaya® product line includes a patented Anti-Condensation Valve (ACV™) which creates a vacuum seal to keep water and condensation from entering the lamp housing. Other features include large, easy-access, top and side openings to the junction box; patent-pending HydroLock™ technology to seal the junction box; and a dual-axis OptiLock™ mechanism for both customized lamp aiming and secure optical adjustment.

The Tenaya® product has an 8" diameter aperture available in flat, dome, or extra heavy-duty glass, plus fully adjustable (360 degrees) accessories including a rock guard, slotted rock guard, glare shield, and half dome. Lamping and power supply features include low voltage, metal halide, compact fluorescent, high pressure sodium, and mercury vapor. The Tenaya® also has a leveling trim collar which allows for adjustment of the faceplate to compensate for uneven installation conditions. Tenaya® is available in aluminum, brass, or stainless steel construction with over 200 standard finishes.

"We are not new to the in-grade lighting market," said Ron Naus, Vice President of Sales and Marketing for B-K Lighting. "We know the market well and understand how important it is for designers and maintenance people around the world to finally have an in-grade fixture that is easy to install, is fully adjustable, and that can withstand the harshest of weather and water situations. We are pleased to present this amazing lighting fixture to the world."

END IT

B-K Lighting, Inc. manufactures standard and custom fixtures for architectural and landscape lighting including path, sign, area, flood, recessed building mounted, and in-grade applications. B-K Lighting products are installed in beautiful applications around the world.

QUALITY, SERVICE, INNOVATION, and VALUE all add up to make B-K Lighting the number one choice in outdoor lighting.
