

We Pledge Never To Forget

For the past seven years, B-K Lighting, Tekla Illumination, Star Finishes and Blue Dolphin Engineering has held an annual 9/11 Memorial service acknowledging the brave men and women who performed unselfish acts of heroism that terrible day the United States was attacked by terrorists.

As proud employees and citizens of our country, we have pledged to remember those whose lives were tragically impacted on September 11, 2001.

"Many lives were changed that day, our world was changed that day," said Douglas W. Hagen, President and CEO in his keynote address.

B-K Lighting provided Precision² HP² in-grade fixtures to uplight each marker for the Flight 93 Memorial in Union City, CA.

"We were awakened to the fact that there are people in the world that would destroy innocent lives, American lives, to advance their twisted ideology. We realized that day that we need protection, and we asked the question; who will provide that protection? And that day we got our answer, our military."

More than 120 people attended this year's ceremony including our neighbors, family and members of Boy Scout Troop 223 Sequoia Chapter.★

B-K Lighting designed and manufactured custom fixtures for Liberty Park Project in New York City.

Art a la B-K!

At B-K Lighting, we consider the manufacturing of lighting fixtures somewhat of an art form. Now, a BKU alumnus is taking that concept to a entirely new level. Architect Sarah Heller's latest project, entitled "Red Ball" incorporates part of decaying rubber ball, wood chips and lastly,

aluminum shavings which she "swiped" during the Fabrication class at last November's BKU. Hey Sarah, next time remind us to check your pockets before you leave. Just kidding. By the way, "Red Ball" found a home inside B-K Lighting's Administrative Offices.★

"Red Rubber Ball" by Sarah Heller, visit www.seheller.com for more details.

CORNER From The Ground Up

CUSTOM

Design challenge – to continuously light the trees from the ground up after the shrubs fill-in and mature with a metal halide lamp and ballast enclosure for years of uninterrupted service.

Custom Solution - Everest "B" fixture, PAR20 35W Metal Halide lamp mounted to a 15" aluminum stem with a 360SL knuckle for controlled aiming; attached to a PM3 monument installation with PVC power pipe encased in cement was the answer. Easy to get to when re-lamping or changing a ballast.

Custom#: CUS-1827-85
Project: Constitution Center (D.C. Area)
Specifier: Cline Bettridge Bernstein (NYC, NY)
Sales Rep: The New Design Light (Hanover, MD)

Please save this in the "Custom" section of your B-K Lighting binder

B-K LIGHTING smartsweepstakes Monthly Winners!

Our monthly winners in the SMART SWEEPSTAKES took full advantage of the new Mini DriveStar™/iLUME™, TEKA High Light™ and UPM™ sample cases! Our lucky winners will receive a fabulous prize from our prize vault! Congratulations David and Maria!★

JULY WINNERS

Dave Yates of The New Design Light in Hanover, MD presented B-K's UPM™ and Mini DriveStar™/iLUME™ and TEKA's High Light Series to Lighting Designer Maria Abapolnikova of Palindrome Lighting Design in Crofton, MD.

Green Team Tip

Make Your Ironing More Energy Efficient
 Place aluminum foil underneath the iron board cover. The aluminum foil reflects the heat back to the clothing, so you can iron the other side of your clothing while you iron the topside.
