

Options and Accessories

Adjustable Lamp Bracket

Permits 24° of vertical lamp adjustment in back-box mounted products. Captive thumb screw and quick release bracket maintains optical alignment during relamping.

Thermal Protector

Permits installation of back-box mounted product into stud wall construction. For use with 20 watt maximum lamp.

Color Filters

Heat treated, solid-color glass expands design possibilities through the introduction of color. Available on all products. Consult factory for additional color options.

Lenses and Louvers

11

Black honeycomb baffle reduces glare by controlling light at 45° cutoff.

10

Spread lens uses clear prismatic pattern to uniformly increase lamp beam.

12

Soft focus lens diffuses pattern to provide even illumination without increasing lamp beam pattern.

13

Rectilinear lens elongates lamp beam pattern. Optimized for use with spot distributions.
