

### Standard Installation

TOOLS NEEDED:

7/64" & 0.050" Allen Wrench

Waterproof Wire Connectors

## INSTRUCTIONS PERTAINING TO A RISK OF FIRE, OR INJURY TO PERSONS IMPORTANT SAFETY INSTRUCTIONS

#### Lighted fixture is HOT! WARNING - To reduce the risk of FIRE OR INJURY TO PERSONS:

Turn off/unplug and allow to cool before replacing lamp/LED. Fixture gets HOT quickly! Contact only switch/plug when turning on. Do not touch hot lens, guard, or enclosure. Keep fixture away from materials that may burn. Do not operate the luminaire fitting with a missing or damaged shield. Do not touch the source at any time. Use a soft cloth or gloves. Oil from skin may cause damage.

#### SAVE THESE INSTRUCTIONS

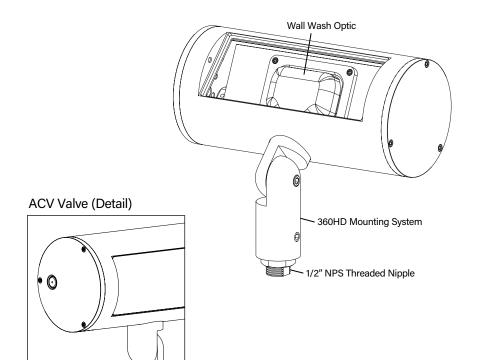

## IMPORTANT SAFETY INFORMATION - READ, FOLLOW, AND SAVE ALL SAFETY AND INSTALLATION INSTRUCTIONS

- Product must be installed by a qualified person in a manner consistent with its intended use and in compliance with the National Electrical Code, Canadian Electrical Code, and all Local and Provincial Codes
- · Follow product label information and instructions.
- Qualified Personnel with appropriate personal protective equipment must perform all servicing of this product.
- Before wiring to power supply and during servicing, turn off and lock out power at fuse or circuit breaker before service.
- The use of accessory equipment not recommended by the manufacturer or installed contrary to instructions may cause an unsafe condition. The use of damaged components may cause an unsafe condition and void product warranty.
- Do not block light emanating from product in whole or part, as this may cause an unsafe condition.
- Never operate the fixture with missing or damaged lens.
   Lens must be cleaned on regular basis.
- Entire fixture may become extremely hot. Do not touch hot lens or fixture body.
- Replace LED assembly only with correct wattage and type of power supply appropriate for LED assembly.
- All gaskets, o-rings and sealing surfaces must be kept clean during installation and service; failure to do this may cause an unsafe condition and void product warranty.

## **IMPORTANT LISTINGS AND CERTIFICATIONS**

· Suitable for wet locations · Additionally suitable for mounting within 4 ft. off the ground

### YO - Yosemite

## ⚠ REMOTE WIRING

#### LED Driver

Remote driver installations require inter-connected wiring between the LED and driver (not included). Drivers have specific wiring requirements between these components. Driver manufacturers regularly recommend the following wiring details for such installations:

 Do not exceed 50 foot overall wiring distance using 12 gauge copper wire.

Failure to comply with specific wiring requirements will void product warranty.

Please refer to specified remote driver housing documentation for detailed installation instructions

## Standard Installation

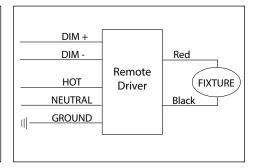

## Fixture Installation

- Mount fixture onto suitable enclosure according to designed lighting plan.
- 2. Secure ½" NPS stem to mounting option. Secure with provided locknut if applicable.

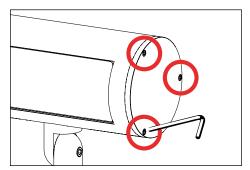

Make watertight connections from remote driver to fixture leads using waterproof wire connectors. See wiring diagram.

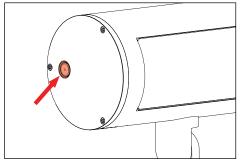

WIRING DIAGRAM

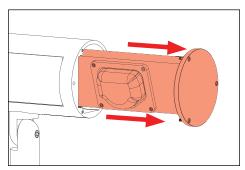

## LED and Optic Replacement

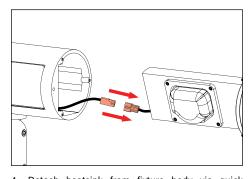

- Loosen three (3) captive #6-32 screws securing cap/socket assembly with a 7/64" allen wrench.
- $\underline{\bigwedge}$  NOTE: Only one end cap (without ACV) is removable.

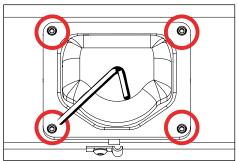

Depress patented Anti-Condensation Valve (ACV) to release vacuum and pull cap/socket assembly to access. Screws will be retained in cap.

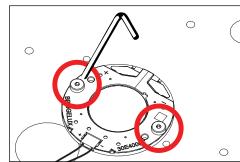

- Carefully pull out end cap assembly. LED is still attached to leads.
- ⚠ Do not pull on connector or wiring. Handle with care.

- Detach heatsink from fixture body via quick disconnect.
- $\underline{\bigwedge}$  Do not pull on connector or wiring. Handle with care.

Loosen four (4) #6-32 screws on wall wash optic holder using a 7/64" allen wrench, then gently pull away to remove from heatsink.

6. Loosen, then remove two (2) #4-40 screws from LED module using a .050" allen wrench.

## Standard Installation

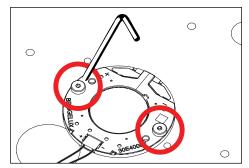

7. Carefully remove LED module from heatsink.

 $\underline{\bigwedge}$  Do not pull on connector or wiring. Handle with care.

 Use small pick tool to push connector off LED board through two small slots behind connector. Once loose, lift connector upwards and off board.

 $\underline{\bigwedge}$  Fragile! Do not pull on connector or wiring. Handle with care.

 Spread thin, even layer of thermal paste on back of new LED module. Place new LED module onto heatsink, lining up module with holes for screws. Tighten two (2) #4-40 screws using a .050" allen wrench to secure LED module to heatsink.

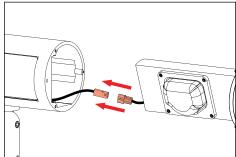

10. Press connector straight downwards into slot on module to snap into place.

 $\bigwedge$  Connector will only fit in one direction.

 Place wall wash optic over LED module, lining up screw locations with holes in heatsink. Secure wall wash optic to heatsink with four (4) #6-32 screws using a 7/64" allen wrench.

12. Attach heatsink to fixture via quick disconnect.

13. Re-install end cap assembly.

 Tighten three (3) captive #6-32 screws with a 7/64" allen wrench to secure cap assembly.

## **IMPORTANT LISTINGS AND CERTIFICATIONS**

· Suitable for wet locations · Additionally suitable for mounting within 4 ft. of the ground

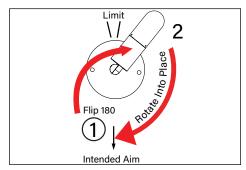

## 360HD Knuckle Mounting System

- Use a 3/16" allen wrench to slightly loosen one (1) 3/8"-16 set screw on the knuckle for 360° aiming purpose.
- Rotate fixture at base and aim fixture to desired horizontal location.

If the over-rotation protection pin is in the desired aiming position, do not force the fixture past the limit. Using a 3/16" allen wrench, slightly loosen both set screws in the knuckle, enough to move the fixture freely on both axes.

- Flip the fixture 180 degrees over the knuckle. The rotational range limit will now be 180 degrees from the original position. Now rotate the fixture into the desired aiming position.
- Secure aim by tightening one (1) 3/8"-16 set screw using a 3/16" allen wrench.
- Warning: Do not over tighten cap set screws. Doing so will compromise o-ring seal and will void warranty.
