#### **INSTRUCTIONS PERTAINING TO** A RISK OF FIRE, OR INJURY TO PERSONS IMPORTANT SAFETY **INSTRUCTIONS**

#### Lighted fixture is HOT! WARNING - To reduce the risk of FIRE OR INJURY TO PERSONS:

Turn off/unplug and allow to cool before replacing lamp/LED. Fixture gets HOT quickly! Contact only switch/plug when turning on. Do not touch hot lens, guard, or enclosure. Keep fixture away from materials that may burn. Do not operate the luminaire fitting with a missing or damaged shield. Do not touch the source at any time. Use a soft cloth or gloves. Oil from skin may cause damage.

#### SAVE THESE INSTRUCTIONS

# **IMPORTANT SAFETY INFORMATION - READ, FOLLOW, AND SAVE ALL** SAFETY AND INSTALLATION INSTRUCTIONS

- · Product must be installed by a qualified person in a manner consistent with its intended use and in compliance with the National Electrical Code, Canadian Electrical Code, and all Local and Provincial Codes
- Follow product label information and instructions
- · Qualified Personnel with appropriate personal protective equipment must perform all servicing of this product.
- · Before wiring to power supply and during servicing, turn off and lock out power at fuse or circuit breaker before service.
- · The use of accessory equipment not recommended by the manufacturer or installed contrary to instructions may cause an unsafe condition. The use of damaged components may cause an unsafe condition and void product warranty.
- · Do not block light emanating from product in whole or part, as this may cause an unsafe condition.
- · Never operate the fixture with missing or damaged lens. Lens must be cleaned on regular basis.
- · Entire fixture may become extremely hot. Do not touch hot lens or fixture body.
- · Replace LED assembly only with correct wattage and type of power supply appropriate for LED assembly.
- · All gaskets, o-rings and sealing surfaces must be kept clean during installation and service; failure to do this may cause an unsafe condition and void product warranty.

#### Standard Installation

 Core drill 1-3/4" dia. hole 1" deep into material for mounting collar. Core drill 1-1/4" dia. hole 4-1/8" deep for fixture. If wire way is needed, drill 1/2" dia. hole as necessary for 12-gauge 2-wire low voltage cable.

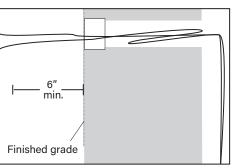

2. Prepare epoxy according to instructions on 3. packaging.

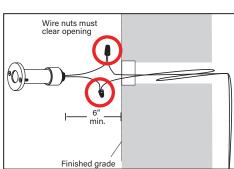

. Use mixing stick to apply the epoxy to the interior of the hole as shown.

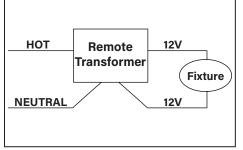

- 4. Fit surface mount collar into hole so it is flush with finished surface. Wipe off any excess adhesive.
- MOTE: The optical opening on faceplate will align with the threaded holes in the surface mount collar.

- Supply low voltage wiring necessary for installation. Loop minimum of 6" of low voltage wire behind mounted collar to allow for fixture service.
- MOTE: Leave sufficient wire length in hole for future service.

 Pull low voltage wire through flush mount collar and make two watertight connections using waterproof wire connectors (not included). Wire connector must clear opening. Insert wires and fixture back into hole. See wiring diagram.

WIRING DIAGRAM

- Mount faceplate to collar using two (2) #6-32" flat head cap screws with a 5/64" allen wrench.

# IMPORTANT LISTINGS AND CERTIFICATIONS

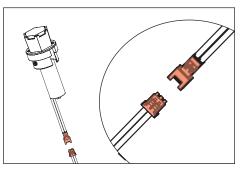

# Re-placing LED Board/Driver and Optics

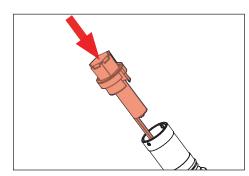

1. Use a 5/64" allen wrench to loosen #8-32 stainless steel set screw and remove cap.

 Use a .050" allen wrench to loosen two (2) #4-40 stainless steel set screws below LED board on the heat sink. Gently pull up on LED board and Driver assembly to expose quick disconnect.

3. Disengage LED board and driver assembly. Replace with new board and driver assembly.

- Reverse install LED board and driver by carefully wrapping 18 gauge wires around driver and inserting into fixture body. Secure LED board in place with two (2) #4-40 stainless steel set screws.
- 5. Use small flat head screw driver to remove lens from optic holder on the LED. Snap new optic in place. Replace cap on fixture and tighten set screw.
